TECHNO-ART™ WATCH WINDERS

Watch winders made of the finest wood, leather, and suede. Silent and durable Japanese motors smart-programmed to wind virtually any watch, without overwinding which can induce stress to the internal mechanisms. Many of these winders have AC/DC operation and can work with the included adaptor or with batteries. (Not included) Larger models are AC only. There are four different types of programmed settings available. The watch winder rotates clockwise, counter-clock wise, or auto swap to meet most automatic watch requirements All of our winders will fall under one of these categoral settings.

No. **BX-670**
